

Feel BrightLight Visor

Portable Light Therapy System

The Latest in Light Therapy Convenience

Light boxes have been around for over twenty years and Physicians who prescribe bright light therapy sometimes cite "inconvenience" (i.e. not having or not taking the time to sit in front of a light box) as the primary reason for their patients not complying with a phototherapy regimen. The Feel Bright Light Visor offers new choices for patient convenience.

The Feel Bright Light Visor is a self-contained rechargeable phototherapy device that attaches underneath any visor or hat allowing people the freedom to take their daily dose of light while performing other activities. Imagine being able to wake up in the morning, putting the Feel Bright Light Visor on and walking into the kitchen, putting on a pot of coffee and eating breakfast, reading the newspaper, watching television, etc. With the Feel Bright Light Visor you can have your bright light therapy and be truly mobile at the same time.

- **Visor Options:** Attaches to most visors.
- **Light Output:** There are two settings – 8,000 and 12,000 lux. Select your light intensity setting at the push of a button and move about freely while getting your dose of bright light for the day.
- **Built-in Timer:** Automatic 30 minute shut-off tells you treatment is done.
- **Battery Operated:** Lightweight lithium polymer battery offers up to 4 treatments before requiring recharging.
- **Safe:** The lights produce no UV and no heat and automatically shut off after a 30 minute exposure.

Why the Light Visor LED is better and safer than Blue LED

The Feel Bright Light Visor uses long lasting LED bulbs that utilize blue-green light in the wavelength range of +/-500 nanometers, which studies have proven to be most effective. This wavelength has also shown to avoid potential long term eye problems associated with Blue LED light therapy units.

These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.

SPECIFICATIONS

Model Number	NLT - FBL
Description	Portable Light Therapy System with LED in a Visor
Dimensions	4" x 2.5" x 1.5"
Weight	1.8 oz.
Light Source	LED
Intensity	8,000 or 12,000 lux
Color	blue-green – 500nm
Auto shut-off	At 30 minutes
Battery	lithium polymer Rechargeable, 110v wall or 12v vehicle power source
Manufacturing	Made in North America
Warranty	5 year unlimited warranty

About Northern Light Technologies

Northern Light Technologies was launched over 20 years ago by a team of engineers with advanced degrees in engineering and lighting technologies. In 1993, the Company co-founded the Circadian Lighting Association, an international association of light therapy manufacturers adhering to a Code of Practice for improved safety and efficacy.

Today Northern Light Technologies has grown to become one of the largest manufacturers of innovative light therapy and specialty lighting technology products in the world.

- Experts in Lighting Technology
- Factory Direct made in North America
- Products proven through Research and Development
- Physician Recommended for over 20 years
- Broadest Product Line
